SCHEDULE

RESTRICTIVE COVENANTS

(please confirm whether or not the restrictive Covenants are onerous)

- 1 The Property is subject to rights reserved by a Conveyance dated 27 January 1993 in favour of 52 Castle Street to use the Service Media and the right at reasonable times on giving notice (except in the case of emergency) to enter on to the Property to clean, empty, repair, maintain, renew or disconnect any Service Media.
- 2 The Property is subject to rights granted by a Transfer dated 27 January 1993 in respect of 50 Castle Street to use the services (as above).
- 3 A right of support from the Property in respect of the buildings at number 50.
- 4 The Property is subject to rights reserved by a Transfer dated 22 August 2003 as follows:
 - 4.1 The right for the adjoining property to erect any buildings on the adjoining property even if it interferes with rights of light and air to the Property.
 - 4.2 All easements, quasi easements and rights which were enjoyed by the adjoining property at the time of the Transfer.
 - 4.3 The right to use all service media in the Property and the right to enter onto the Property on giving reasonable written notice save in case of emergency with or without equipment to carry out any maintenance, repair, cleansing or renewing of the service media.
 - 4.4 Rights of support from the Property for the buildings on the adjoining property.
 - 4.5 The right on giving notice save in emergency to enter onto the Property as far as reasonable necessary to carry out any works on the adjoining property, including a right to erect scaffolding.

These rights are to be exercised causing as little damage and inconvenience as practicable and making good any damage caused. It is believed that the properties benefiting from these covenants are the land at the rear and the land comprising 54 Castle Street.

ADVERSE INTERESTS

(please confirm whether or not the Adverse Interests are onerous)

- 1 The Property is subject to 2 Leases as to which see the separate Lease Reports.
- 2 The Property has a potential for chancel repair liability and a chancel repair indemnity policy will be on risk at completion for the value of the Property.
- 3 Planning []
- 4 An Asbestos Risk Assessment Report has been obtained in respect of the Unit 46 Castle Street only. This indicates that there is some potential asbestos under the floor coverings (probably in the adhesive that was used). It is not considered that this is an immediate danger and should be monitored, but if there is further deterioration then it may require removal. Removal is not required by a licensed contractor.

A Report for 48 Castle Street has not been provided.
- 5 Local Search []
- 6 It is now standard procedure to undertake environmental desktop searches in transactions of this nature. However please note the limited nature of the search. The search is undertaken by

independent search consultants at a limited cost and is compiled by the search consultants on the basis of inspection of documentary records only accessed by means of a "desk top" search. It does not, of course, arise from a physical inspection of the site. Clearly it will not reveal information which is not recorded in public documentation. The search should therefore be regarded as a general guide only. If you have concerns as to possible contamination of the site then you should discuss further with us the need for a more detailed survey (possibly including a site survey). You will understand that we are not qualified to advise on whether or not the search results are acceptable (or the level of risk involved) but we would be happy to discuss any particular queries with you and to consider with you whether further expert advice should be obtained on any matters arising from the search result itself and/or with regard to the site or your proposals generally.

Subject to the comments above we would point out that the report has been certified as "Passed" meaning that in the professional opinion of Groundsure the level of risk associated with the information disclosed in the report:

- (a) is unlikely to have an adverse effect on the value of the Property, and
- (b) is not such that the Property would be designated "Contaminated Land" within the meaning of Part IIA of the Environmental Protection Act 1990.

The Property is within 25 metres of being assessed to have negligible risk of flooding.

The search confirms that the Property is not within an area of coal mining activity.

The Property is in an area where there is a low potential for natural ground subsidence.

The Property has been identified to lie within 5 kilometres of solar farms.

There are various trade entries within the vicinity of the Property.
