Insp.No.	Location	Description	Material	MA	Recommendations
17	Sixth floor, 70, Wall, Downpipes	Downpipes labelled, no sign of obvious damage noted in previous survey.	Cement.	4	Manage
18	Sixth floor, 76, Lift mechanism, Brake shoe	Brake shoe presumed as unable to safely isolate lift during visit.	Composite.	4	Manage

“Manage” we would recommend that a written programme be arranged for regular re-inspection of the materials, including the frequency of re-inspections. We would recommend that the re-inspections should be carried out **at least** every 12 months and the programme be updated accordingly. The point of the re-inspection is to monitor the condition of the material to ensure that there has not been undue damage or deterioration. If Excess damage has been caused then remediation work may be required.

*NB: The Borrower has confirmed that the recommendations have been complied with as the two issues identified are being managed.*

*The valuer has confirmed in an email dated 29.08.18 that the contents of the asbestos report do not have an adverse impact on the Valuation.*

**(b) Access Audit**

An Access Audit (also known as a DDA audit, Disability Discrimination Act Audit or Disabled Access Audit) is an assessment of a building, an environment or a service against best-practice standards to benchmark its accessibility to disabled people.

Under the Equality Act 2010 (and the DDA before it) there is a duty for service providers to ‘anticipate’ potential barriers to access. Whilst there is no explicit statutory requirement to undertake access audits, it is rather difficult to anticipate and remove barriers without a structured assessment to identify them in the first place.

*NB: The Borrower has confirmed that this will be obtained in the future if this is required in either the annual health and safety report or the Fire Risk Report or any of the other safety reports.*

**(c) FRA**

The Borrower has supplied a copy of a Fire Risk Assessment for the Property dated 28.06.18 prepared for the Borrower. It confirms:

*Risk to life from fire at this building is: “Tolerable Risk”. This means that there are no major additional controls required. However, there may be a need for consideration of improvements that involve minor or limited cost.*

There are High, Medium and Low risk recommendations contained within the report.

*NB: The Borrower has confirmed that the above recommendations have been complied with.*
