Lender Risks	Mitigant	Risk Level
<b>The Borrower is not able to successfully execute their business plan.</b>	<p>Good income is being produced, and unusually for this asset class, on good leases.</p> <p>This ought to enable a straightforward refinance as intended.</p> <p>If they are unable, and if all interest payments are met on time throughout the term, we may also wish to provide the Borrower with a further loan on maturity.</p>	Medium
<b>The Borrower stops making monthly interest payments to Lenders due to loss of lease income and or tenants whose leases had ended, had exercised a lease break or have gone into receivership.</b>	<p>The ICR is good at 2.17x and on good tenancy agreements, with a reasonable spread of tenants.</p> <p>Further comfort is gained from the holding of a 6-month Interest Reserve.</p>	Medium

Lender Risks	Mitigant	Risk Level
<p><b>The Borrower is unable to repay the loan principal at the end of the loan term because they have not been able to sell or re-finance the property.</b></p>	<p>As above, it is envisaged that the planned refinance will prove straightforward, as long as the Borrower performs, and tenants continue to pay their rental obligations.</p> <p>We have provided with the most recent three months bank statements held confirming all stated rents have been received.</p>	<p>Medium</p>
<p><b>The Property falls in value due to either macroeconomic or property specific reasons</b></p>	<p>At 65% LTV, the Property would have to fall in value by 35%/£938k, before lenders in tranche B would be affected.</p> <p>The Property though is a long-term investment for the Borrower, and the Borrower has no short or medium term plans to sell.</p>	<p>Medium</p>
